

Filtrol 160™

Filtrol 160

Model#	Description	Code #
	The Filtrol® 160 by Septic Protector is a patented, re-usable filter designed to capture laundry lint and non-biodegradable fibers from washing machine discharge water. When properly installed, used and maintained, this filter keeps lint and synthetic fibers from getting into drains and septic systems, and thereby reduces the chance of home owners' septic system drain fields, sewer pipes and drains getting plugged with these fibers.	
	Filtrol 160 Septic Protector with 1 Extra Bag, 2 Adapters & Hose	371-0160
	Replacement 160 Micron Filter Bag	371-0200
